## Print\*One

### Print wherever you are

**Freefloat Print\* One** allows the use of a local printer over network, wired or wireless with full security and flexibility.

Combined with applications used today, Freefloat Print\*One offers a printing platform ready for the future.

**Freefloat Print\*One** is a LPD server implemented in software, fully replacing print servers, network adapters and other special hardware.

Easily installed on any supported platform, Print\*One is the straight forward way to turn existing printers, serial or parallel connected, into network devices. Integrating PDAs and bluetooth printers, is done without any changes in the application.

Key features:

- LPD protocol
- Standard Windows printing
- Supports COM and LPT ports
- Blue tooth printing using virtual COMP ports
- Hand shaking RTS/CTS, XON/XOFF
- Transparent to applications

Operating systems supported:

- Windows CE 4
- Windows CE 5
- Pocket PC
- Windows 2000
- Windows XP
